

THANNAMALA JITHENDRA REDDY

Kundam • +91 7032045955 • trjr0905@gmail.com • LinkedIn • GitHub

Professional Summary

Recent Computer Science graduate with hands-on experience in Python, Flask, SQL, REST API development, and full-stack web application development using React.js and MySQL. Skilled in Object-Oriented Programming (OOP), CRUD operations, database design, Git/GitHub, and building scalable backend applications. Familiar with Linux (Ubuntu), software development best practices, and Machine Learning concepts. Strong problem-solving and analytical skills with the ability to write clean, reusable, and maintainable code.

Education

Saveetha School of Engineering

Chennai, India

Bachelor of Engineering – Computer Science and Engineering | GPA: 7.8

Oct 2021 – July 2025

Experience

Python Full Stack Trainee | Codegnan IT Solutions

Apr 2026 – July 2026

- Developed 3 full-stack web applications using Python, Flask, React.js, and MySQL, implementing Object-Oriented Programming (OOP), secure authentication, responsive user interfaces, and relational database integration to manage 100+ records.
- Designed and developed 25+ REST APIs for CRUD operations and frontend-backend communication, improving application performance by 20% through SQL query optimization while using Git for version control, Postman for API testing, and debugging applications to ensure reliable functionality.

Technical Skills

Languages: Python, JavaScript, SQL

Frontend: HTML5, CSS3, React.js

Backend: Flask, FastAPI, Django **Database:** MySQL **Tools:** Git & GitHub, Postman

Core Concepts: Object-Oriented Programming (OOP), CRUD Operations, Database Design, SQL Query Optimization, RESTful APIs, Data Structures & Algorithms, Problem Solving.

Projects

E-commerce Website | React.js, Python, Flask, MySQL, HTML5, CSS3

- Developed a full-stack E-commerce web application using Python, Flask, React.js, and MySQL, implementing secure Vendor and Customer modules, authentication, relational database design, and optimized CRUD operations to manage 100+ records.
- Designed Built 10+ REST APIs using Python, Flask, and MySQL for e-commerce modules, improving backend performance through SQL query optimization and API testing using Postman.

Employee Management System | React.js, Python, Flask, MySQL, HTML5, CSS3

- Developed a role-based Employee Management System using Python, Flask, React.js, and MySQL, implementing secure authentication, employee registration, profile management, and optimized CRUD operations with relational database integration.
- Built 25+ REST APIs using Python and Flask with MySQL integration, improving application performance by 20% through SQL query optimization and backend performance tuning.

Certifications

Python 101 for Data Science – IBM

Python Beginners Complete Bootcamp - Udemy

Achievements

- Completed Python Full Stack Development training in Python, Flask, REST APIs, React.js, MySQL, Git, Django.
- Solved 200+ programming problems on coding platforms.
- Developed multiple backend applications using Python, Flask, REST APIs, and MySQL.
